

## Jewish Cemetery Lackenbach

### Data

### Description

The oldest headstone in this cemetery, which has an area of 8,959 m<sup>2</sup>, originates from 1729. In total, by 1938 1,747 dead of the large Jewish community of Lackenbach had been buried here. Unfortunately, most of the headstones are made of sandstone and are therefore completely illegible or difficult to decipher. In the mid-1990s the Association Schalom completely renovated the cemetery, built an access road and a car park and up-righted and created new bases for approx. 800 headstones.

Bergstraße 50, 7322 Lackenbach, Burgenland | [show on map](#)

## **sub-project 2**

## **Description**

### **Realization local construction supervisory authority**

At the Jewish cemetery in Lackenbach, work must be carried out by a Master Builder and ancillary work must be undertaken. This involves the following services: restoration of the cemetery building in the northeastern area of the cemetery and the renovation of the cemetery wall. Furthermore two trees will be felled and pruning and ivy removal will be carried out. In addition the graves will be restored and preserved. This will involve structural reinforcement and preservation of the graves from the damage groups 1 and 2 (heavily or substantially damaged). Additionally, the services of the local construction

supervisory authority that did not form part of sub-project 1 will be commissioned.
