

SUPPLEMENT I

Guidelines for awarding funding from the Fund for the Restoration of the Jewish Cemeteries in Austria

1. Restoration goal

- 1.1. The restoration goal serves as a basis for all service specifications drawn up for a cemetery and as a basis for the providers of the various services.
- 1.2. The restoration goal of the Federal Office for the Protection of Monuments in cooperation with the Jewish Community Vienna, and planners if applicable, defines the subjects “security” and “substance maintenance”. The term “security” refers to safe access to the cemetery and safe conditions for restoration and preservation work to be carried out. The thematic area “substance maintenance” defines the urgent restorative measures and steps that must be taken.
- 1.3. Graves/burial sites or structural features worthy of special note, for example, can be highlighted in the restoration goal; these must be described in detail in the restoration goal.
- 1.4. The restoration goal must deal with the areas: graves/burial sites, trees and shrubs and all physical structures, and accord and set out the essential restoration steps as deemed necessary by the Federal Office for the Protection of Monuments jointly with the Jewish Community Vienna, and planners if applicable.
- 1.5. As a rule the planned renovation steps shall also be prioritized in accordance with the restoration goal in order that it can be referred to or supplemented during subsequent work. In this context any further development shall be closely connected to the “cemetery database” in which the separate priority levels and the related work can be recorded by the providers. A detailed description of the individual priority levels and work steps is then recorded in the cemeteries database.
- 1.6. The restoration goal must be clearly set out for subsequent work (also work carried out at a much later date) and it must be clear which measures were implemented in this regard and which measures will still be necessary.
- 1.7. The Federal Office for the Protection of Monuments will issue an “alteration order” for the work that is formulated in the restoration goal and subsequently advertised and executed.

2. Cost breakdown

- 2.1. The White Book of 2001 by the Jewish Community Vienna, as revised in 2008, formed the basis for the renovation of the Jewish cemeteries. This White Book lists 64 cemeteries. Each cemetery on this list has been attributed the respective cemetery owner’s specific estimation of the extent of restoration work required, although this only takes into account burial sites, graves and tombs, but not paths, boundary walls and other buildings. An estimate of the planning costs was also given in the White Book, however, these planning costs are not included in the individual amount allocated to the respective cemetery. A table was compiled to facilitate the allocation of the designated funds, in which the cemeteries and the restoration amounts allocated to them are listed in euros (as at 2008) and in percent. It shall be determined that the cemeteries, following an initial selection, be subdivided into four groups:

Group 1:

Cemeteries that have already been restored.

Group 2:

Small cemeteries that have not yet been restored, where the cost of the necessary restoration work does not exceed 50,000 euros.

Group 3:

Larger cemeteries in need of restoration; cemeteries which will cost in excess of 50,000 euros to renovate.

Group 4:

Cemeteries in Vienna

- Ad group 1:

The sum total of the amounts assumed for the renovation of the cemeteries that have already been renovated amounts to 178,000 euros. This shall be treated as a reserve.

- Ad group 2

The cost of the renovation comes to 465,000 euros plus VAT. This amount constitutes a pot from which the owners will decide which renovations will be undertaken.

- Ad group 3

The list states the amount plus VAT required for the restoration of each cemetery.

- Ad group 4

The list states the amount plus VAT required for the restoration of each cemetery.

The exact figures can be gathered from the attached list.

2.2. The percentages in the list Appendix 1 may be amended at regular intervals of approx. 5 years by the Jewish Community Vienna in agreement with the Fund for the Restoration of the Jewish Cemeteries in Austria (if the condition of the cemeteries or the circumstances demonstrably change).

2.3. As per 25 March 2014 the Jewish Community Vienna is owner or authorized third party for the renovation of all Austrian Jewish cemeteries in need of restoration (and therefore makes the decision which of these cemeteries will be renovated when). Exceptions are the cemeteries in Hohenems, Bad Aussee, Leoben, Döbling (Vienna), Gmunden, Korneuburg, Marchegg, Tulln.
